Bhubaneswar, Odisha, India

PROFESSIONAL SUMMARY

Data analyst who turns raw datasets into decisions – built a real-time machine learning system that predicts traffic accident severity and hotspot risk from driver, road, and environmental data, and engineered a Random Forest classifier that predicts 5G network SLA compliance from live telemetry with ~96% accuracy. Proficient in Python, SQL, Pandas, and EDA. CGPA 8.32, B.Tech CSE (AI & ML), Centurion University.

TRAINING & CERTIFICATION

AI-Powered Smart Inventory Management System using Python May – Jul 2026

[TutorialsPoint Academy](#)

6-Week Training | Skill India – NSDC Certified

- Completed a 6-week intensive training program building an AI-powered inventory management system in Python, covering inventory data analysis, pattern detection, and workflow automation
- Certified under the Skill India – National Skill Development Corporation (NSDC) “Certificate of Training” program (Certificate No. TP-10TGS7EX)

AI/ML Intern Aug – Sep 2026 (Ongoing)

[InternPe](#)

4-Week Internship Program | Offer ID: IPI#87258

- Currently undergoing a 4-week AI/ML internship (10 Aug – 06 Sep 2026)

PROJECTS

SafeDrive AI – Real-Time Road Safety & Accident Hotspot Prediction System

AI / Machine Learning

- Built a Streamlit web app that predicts traffic accident severity (Slight, Serious, Fatal) using machine learning models trained on driver, road, and environmental factors
- Delivered real-time accident hotspot risk mapping, safer-route suggestions, and nearby emergency-service lookup to support proactive road-safety decisions

5G Small-Cell Network KPI Management Using AI

AI / Machine Learning

- Built a Streamlit-based Network Operations Center (NOC) dashboard that predicts 5G Service Level Agreement (SLA) compliance across network slices (eMBB, URLLC, mMTC, HC) using a local Random Forest classifier
- Trained the model (100 estimators) on 5,000 5G small-cell telemetry records across macro, micro, and pico cells with an 80/20 stratified train-test split, achieving ~96.2% accuracy and ~96.5% F1-score
- Engineered a preprocessing pipeline (StandardScaler + OneHotEncoder) across 10 network KPIs (throughput, latency, packet loss, handovers, RSRP/RSRQ, PRB utilization) and built interactive 3D small-cell topology visualizations, running fully local inference with no external cloud API

EDUCATION

B.Tech in Computer Science & Engineering – AI & Machine Learning

[Centurion University of Technology and Management](#)

Bhubaneswar, Odisha CGPA: 8.32/10

Higher Secondary Education – Mathematics & Computer Science

[Royal Higher Secondary Education](#)

Bhubaneswar, Odisha Percentage: 78%

TECHNICAL SKILLS

Programming Languages

Python SQL Java C/C++

Data Analysis

Pandas NumPy Data Cleaning

EDA Statistical Analysis

Data Visualization

Matplotlib Seaborn Streamlit

Machine Learning

Predictive Modeling

Feature Engineering

Model Evaluation Scikit-learn

Databases

MySQL SQLite

Tools & Platforms

Git GitHub Jupyter Notebook
